

February 6 Rally in Salem: No LNG in Oregon!

Oregon must come together on February 6 to let Governor Kulongoski and your state representatives know that we are UNITED AGAINST LNG!

Statewide Call to Action

**“No LNG in Oregon”
Wednesday, February 6
11 AM to 2 PM
Capitol Steps, Salem**

Why should you care about this?

- There are 3 Liquefied Natural Gas (LNG) projects proposed for the Oregon coast.
- If even one should get built, it will increase Oregon's greenhouse gas emissions by millions of tons per year.
- These projects will cost billions, money that could be spent on clean, renewable energy.
- The terminals and pipelines linking them to California will endanger communities, cross and condemn hundreds of miles of land, and destroy habitat.
- LNG is not needed in Oregon; even the Governor admits that most of the gas is going out of state.
- Ask yourself: Why is Oregon being chosen for LNG that will go to California?

**DON'T LET THIS HAPPEN TO OUR STATE!
COME OUT AND MAKE YOUR VOICE HEARD!**

Can't Make the Rally? On February 6, CALL Governor Ted Kulongoski at 503.378.4582. Demand that he stand up for Oregonians, and veto all LNG terminals. Tell him that you would rather see an investment in clean, renewable energy for Oregon.
